

I want you to understand that I directly benefit from listening to XM Satellite Radio and its traffic and weather channel for the Washington, D.C. area. It provides the best traffic coverage in the region, including any of the local broadcast stations. For me the issue isn't simply convenience, it's a matter of quality of life. XM radio provides a valuable service with this channel, it is not available from broadcast channels, I pay for these services, and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear within the bounds of decency and morality. I strongly and respectfully urge you to reject the NAB's petition 04-160. Please do all you can to support XM's ability to provide the kind of programming that I demand, deserve, and pay for.
